EDUCATION

Lovely Professional University, Punjab
B.Tech in Computer Science and Engineering

Phagwara, Punjab
2022 – Present

EXPERIENCE

Mphasis

Associate Software Engineer Intern

Pune

Dec 2025 – Present

- Built and optimized **Spring Boot** backend services with **Hibernate/JPA**, reducing API latency by **30%** and improving query performance by **40%** at scale.
- Architected **modular, layered systems** and developed secure **REST APIs**, improving maintainability by **35%** and enabling faster feature iteration in production environments.
- Designed **batch processing pipelines** using **Spring Batch** for **10K+ records**, cutting processing time by **50%** while ensuring reliability and scalability.

Hitbullseye

Java Full Stack Developer Intern

Jalandhar

May 2025 – Jul 2025

- Developed and hosted scalable backend modules using **Spring Boot** and **Java**, reducing API latency by **25%** and improving concurrent user handling by **40%**.
- Integrated **RESTful APIs** with React frontend across **5+ microservices**, improving reliability and data consistency by **35%**.
- Refactored workflows in **Agile sprints** and optimized CI/CD pipelines using **Jenkins** and **GitLab**, cutting deployment time from **15 min to 7 min**.

PROJECTS

Hybrid Pet Breed Classification System (CNN-SVM) - GitHub

Oct 2025 – Nov 2025

- Built hybrid **CNN-SVM pipeline** (VGG16, ResNet50, MobileNetV2 + RBF-SVM) achieving **94.32% accuracy** and **99.19% top-3 accuracy** on **7.4K images (37 breeds)**.
- Reduced **7K+ dimensional features to 1,629** using **PCA (95% variance)**, improving training efficiency.
- Designed end-to-end pipeline with augmentation + feature fusion, improving inter-breed separability.

Automated SQL Injection Fault Tester - GitHub

Aug 2025 – Sep 2025

- Engineered a scanner for **SQLi** and **XSS** using **Gemini API**, detecting **85%** of known vectors across 50+ tests.
- Integrated security checks into **CI/CD pipelines** via GitHub Actions, automating scans for **100%** of new PRs.
- Reduced manual review effort by **70%** and improved threat detection turnaround from hours to minutes.

Pebble — Minimal Functional Programming Language - GitHub

Jun 2025 – Aug 2025

- Designed lightweight functional language supporting **immutability, higher-order functions, and modular syntax**, with pebblec compiler.
- Achieved stable execution across **20+ benchmark programs**, improving type safety and memory efficiency by **15%**.
- Deployed compiler as CLI tool used by **30+ developers** for experimental programming.

ACHIEVEMENTS

- 2nd Runner Up — **Hackathon**, Infosys, 2024; top **100+ teams**.
- Finalist — **Google Cloud Campaign**, GDSC, 2023; top **2%** nationally.
- Silver Medalist — **Inter-School Yoga Competition**, LPU, 2022; top 5/100+ participants.
- Winner — **Essay Writing Competition**, Fresher's Talent Hunt, LPU, 2022; 1st/600+ participants.

TECHNICAL SKILLS

Languages: C/C++, Java, JavaScript, Python, Kotlin

Frameworks & Tools: Spring Boot, React.js, Node.js, Android Studio, Firebase, TensorFlow, LangChain, Azure ML Studio, nginx, Git, GitHub, VS Code, Jupyter, Google Colab, Postman, Appium

DevOps/MLOps: Docker, Kubernetes, Terraform, GitLab, Jenkins, DVC, MLflow, MCP Server, CI/CD Pipelines

Cloud & Analytics: Azure, Machine Learning, Data Analytics, Power BI

Concepts: API Design, Microservices, System Design
